

crocodile™

The Crocodile is a walking aid for disabled children and youngsters, who need supplementary assistance with their daily walking

Crocodile aims for harmony, balance and rhythm. Placed behind the child, the frame allows freedom of movement and facilitates walking in the upright position. The adjustable handles can be individually adapted to a position conveniently close to the child's body providing maximum support and stability.

The Crocodile is light, easy to dismantle and safe and easy to use. Crocodile can be used just as effectively by a child who needs little support or by a child needing a fully supported upright gait trainer with all the accessories added.

The Crocodile is available in three sizes and suitable for a large group of children and youngsters. Not all children are alike - that is why it is important to use the measuring chart to find the correct size.

27-69 cm

39-100 cm

max.180 cm

max.80 kg

Height adjustable top frame

Easy to adjust the height without using any tools.

Multi-adjustable handle

Allows you to grow in width as well as in height. Positioning the grips close to the body gives better support and a better walking position.

On/off anti-reverse handles

Keep the unit from rolling backwards. It is very easy to lock/unlock once walking skills improve. The anti-reverse wheel stops are used for children with less balance and control.

Foldable frame

Makes storage and transporting the Crocodile easy.

Standard

As standard the Crocodile is delivered with handles, lockable wheels, anti roll back and tension adjustment on rear wheels

Crocodile size 1

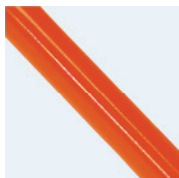

Crocodile size 3

Frame colour

Available in different colours
