

# rabbit™

The Rabbit is secure, reliable, and easy to adjust, meeting the needs of the individual child. It provides children with the opportunity to explore and enjoy new and exciting adventures. Through exercise it promotes development of motor skills and helps redevelop muscles and restore motion to joints

The standing position enables the child to be an active participant, whilst stimulating senses and giving the child more independence. An accessible and simple design ensures the user maximum mobility in the standing position.

Positioning the footplate closer to the floor ensures easy placement and positioning of the child. The child is at the same eye level with their play mates.

The Rabbit comes in four sizes and is suitable for children between the age of 1 to 18 years. Not all children are alike - that is why it is important to use the measuring chart to find the correct size for your child.
